www.linkedin.com/in/rafly-hermansyah-0893b02b9

Summary

Enthusiastic and detail-oriented junior web developer with freelance experience building full-stack web applications using Laravel and React (TypeScript). Skilled in developing CRUD features, integrating REST APIs, optimizing backend queries, and creating responsive user interfaces. Passionate about backend development, clean code, and continuous learning.

Technical Skills

Backend: PHP (Laravel Framework)

Frontend: React.js, Inertia.js, TailwindCSS

Database: PostgreSQL (query optimization, relational design)

Tools: Git, GitHub, Visual Studio Code

Education

MI Sirojuttholibin <i>Elementary School</i>	2013-2019
MTS Sirojutholibin <i>Junior High School</i>	2019-2022
SMAN 3 Singingi Hilir <i>Vocational High School</i>	2022-2025
Universitas Amikom Yogyakarta — Informatika (Ongoing) <i>University</i>	2025 - Present

Experience

Freelance Web Developer — Remote <i>July 2025 - present</i>	2025-present
Developed websites and web applications based on client requirements using PHP/Laravel and React	
Implemented CRUD modules and optimized backend queries	
Created responsive user interfaces and resolved application bugs	
Managed source code with Git and deployed applications to production	

Projects

NEORAIN — Personalized Psychological Assistance Platform <i>Technologies: React, Tailwind CSS, Firebase, Generative AI</i>
Built an AI-powered platform for mood tracking and personal psychological assistance
Integrated DASS-21 assessment features to support structured self-reflection
Designed responsive interfaces and an empathetic virtual assistant experience
Awarded 2nd Place in Software Development at ARCADIA Award 2026

Languages

Indonesian	: Native
English	: Basic to Intermediate

Certification

Basic Artificial Intelligence

Dicoding Indonesia — October 2025

Completed an introductory course in artificial intelligence covering core concepts, practical use cases, and the growing role of AI in modern technology. Gained understanding of how AI can be applied to support problem-solving and digital innovation.

Basic JavaScript Programming

Dicoding Indonesia — March 2026

Completed training in JavaScript fundamentals, including variables, functions, control flow, arrays, objects, and basic DOM interaction. Improved ability to create interactive web functionality and write cleaner front-end logic.

Front-End Web Development for Beginners

Dicoding Indonesia — March 2026

Studied front-end web development fundamentals with focus on semantic HTML, responsive CSS, and interactive user interface creation. Gained practical knowledge for building accessible and responsive web pages.

Building Web Apps with React

Dicoding Indonesia — March 2026

Completed a React course focused on building modern web applications using reusable components, state management, event handling, and application structure. Strengthened skills in developing interactive and maintainable front-end projects.

Fundamental Back-End Development with JavaScript

Dicoding Indonesia — April 2026

Completed an intermediate back-end development course covering RESTful API design, server-side architecture, database integration, and application security concepts. Strengthened understanding of building scalable and well-structured back-end systems.

Achievements

2nd Place Winner — Software Development

ARCADIA Award 2026, Faculty of Computer Science — Universitas Amikom Yogyakarta

Awarded 2nd place for developing NEORAIN, a personalized psychological assistance platform using Generative AI algorithms and the DASS-21 assessment instrument. The project competed in the Software Development category at ARCADIA Award 2026 on February 6, 2026.

Best Creative Concept — Hackathon Informatics Plus 2026

Informatics Study Program & HMIF — Universitas Amikom Yogyakarta

Received the Best Creative Concept award for Auto Rekrut, a recruitment system concept based on Outcome-Based Education (OBE). The project was presented in Hackathon Informatics Plus 2026 on July 27-28, 2026.
